# Climate Action Plans

Many universities, cities, and states have voluntarily developed climate actions plans – conducting GHG inventories, setting targets for emissions reductions, and developing plans for how to reach those goals.

\*\*662 Universities have signed onto the Presidents' Climate Commitment

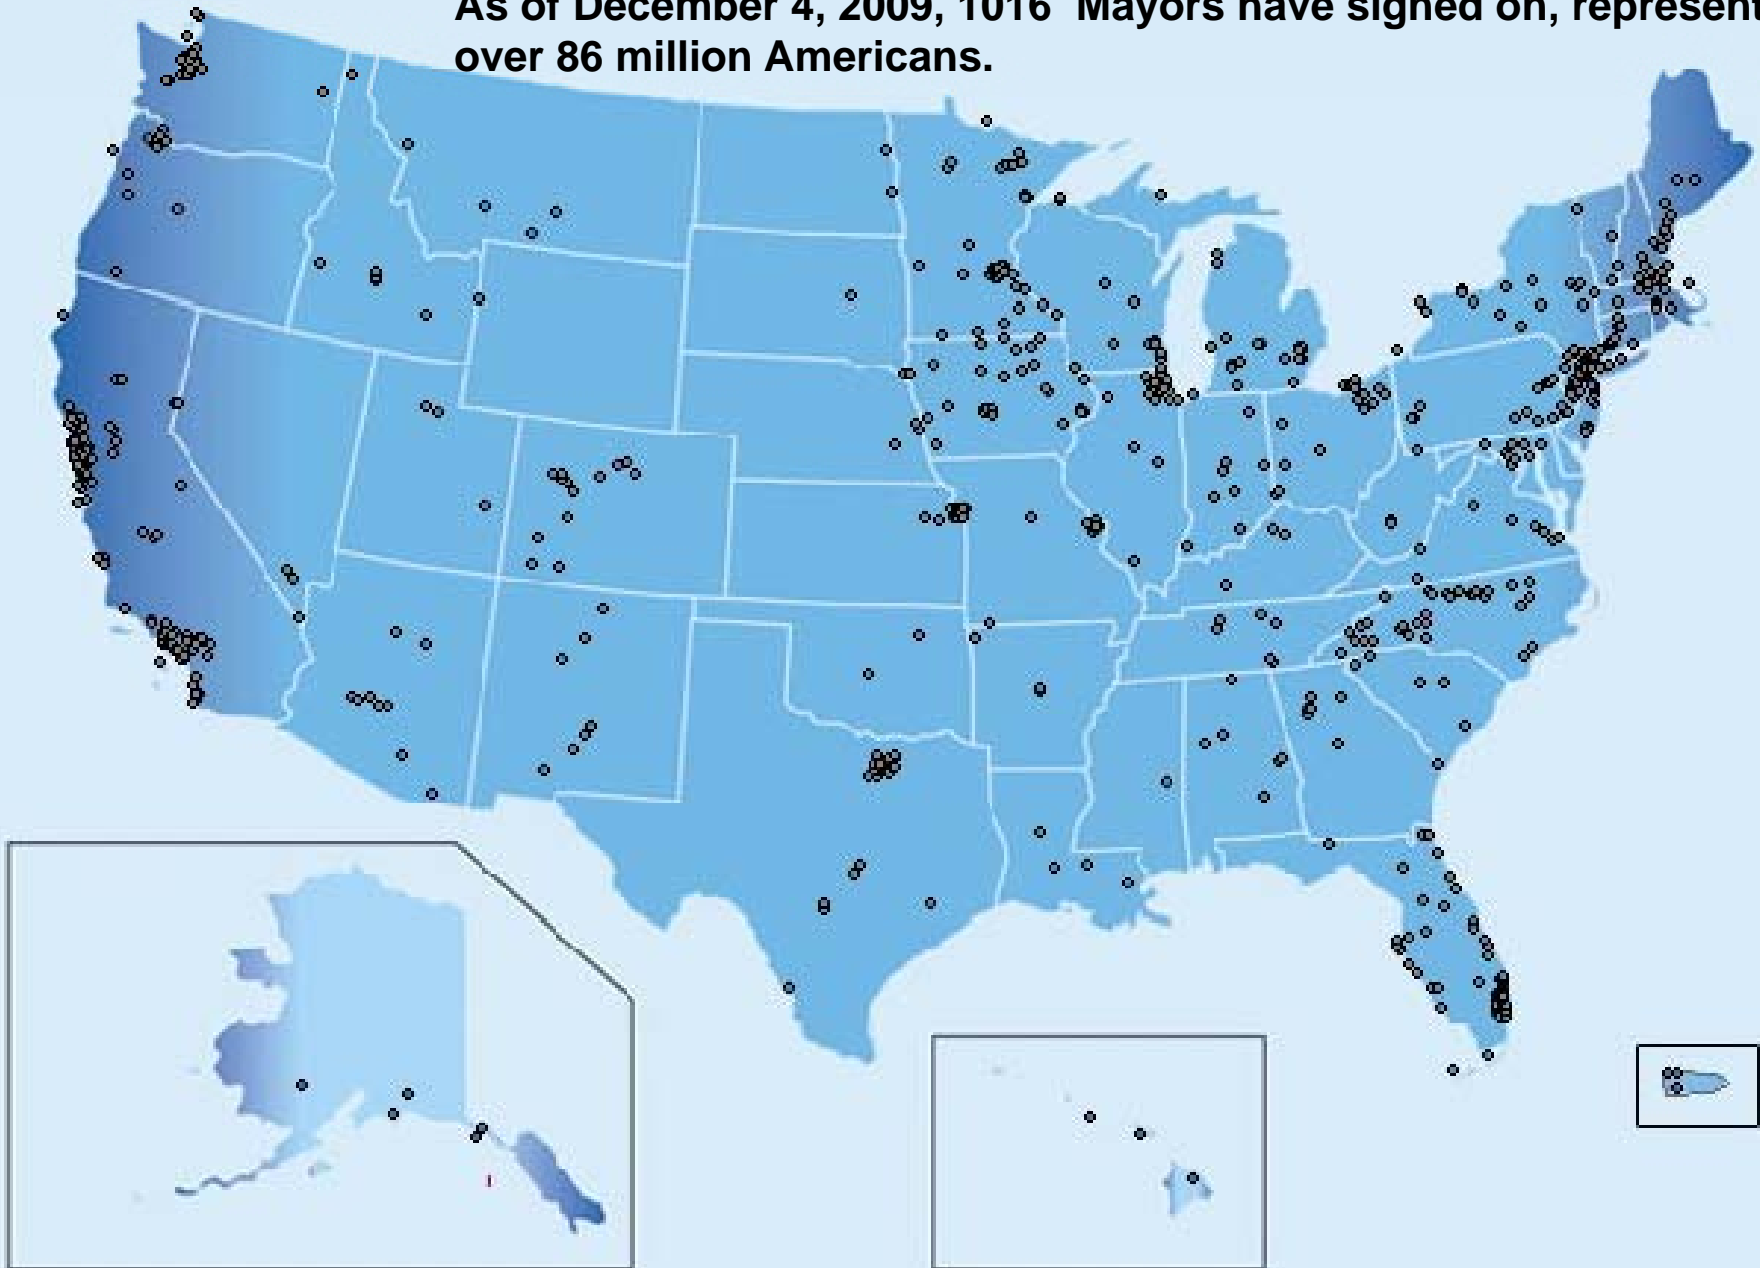

\*\*1016 Cities have signed the Mayor's Climate Protection Agreement

\*\*38 States have or are developing Climate Action Plans

# CITIES

## U.S. Mayors Climate Protection Agreement

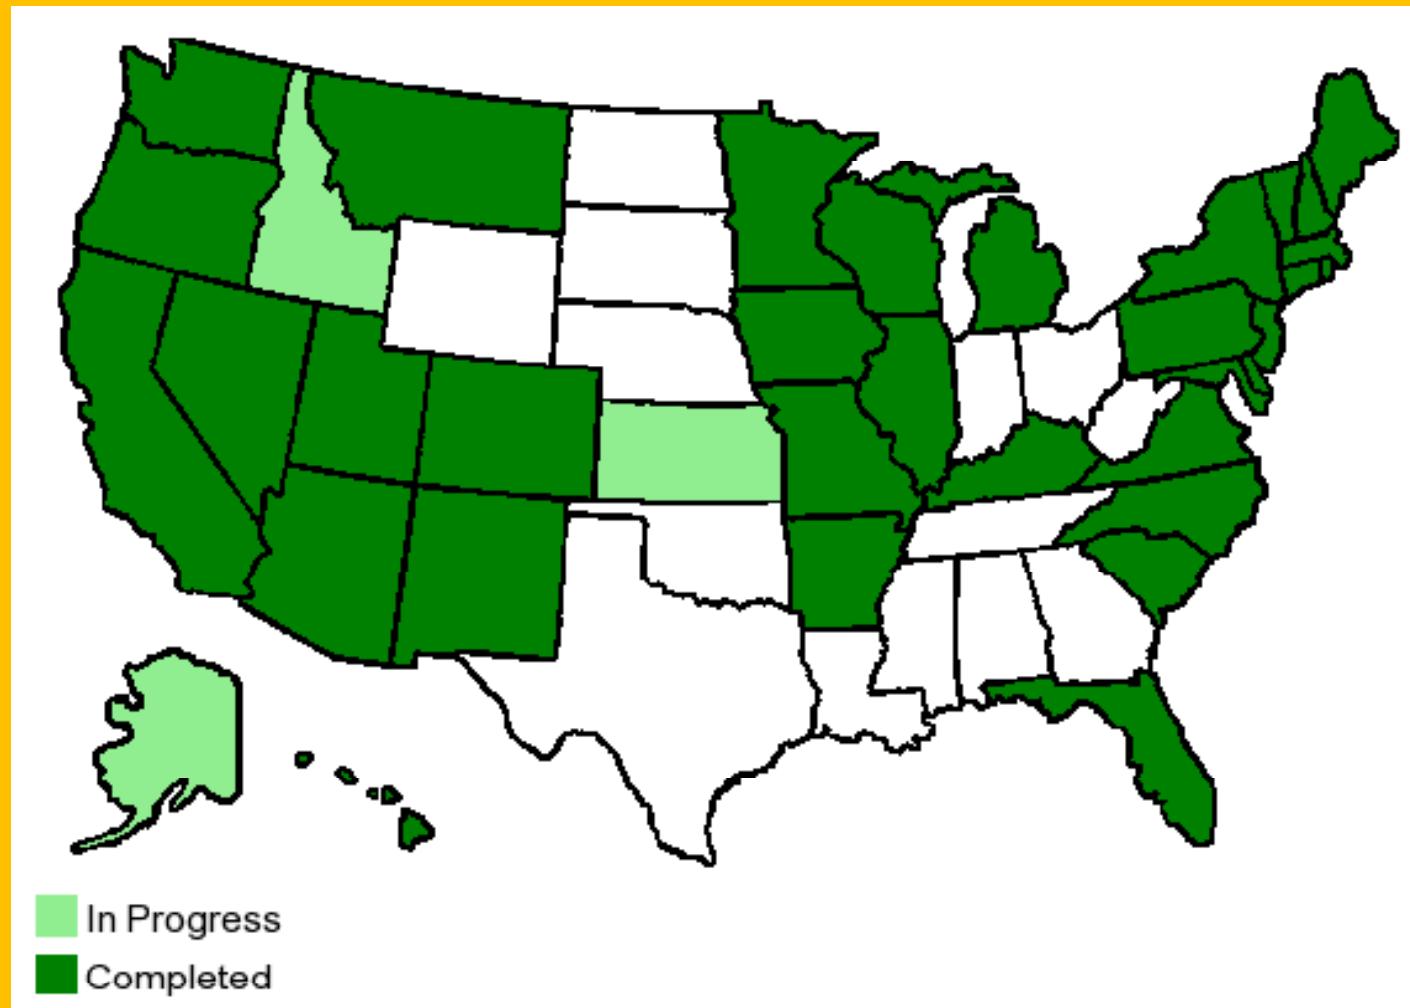

As of December 4, 2009, 1016 Mayors have signed on, representing over 86 million Americans.

## States with Climate Action Plans

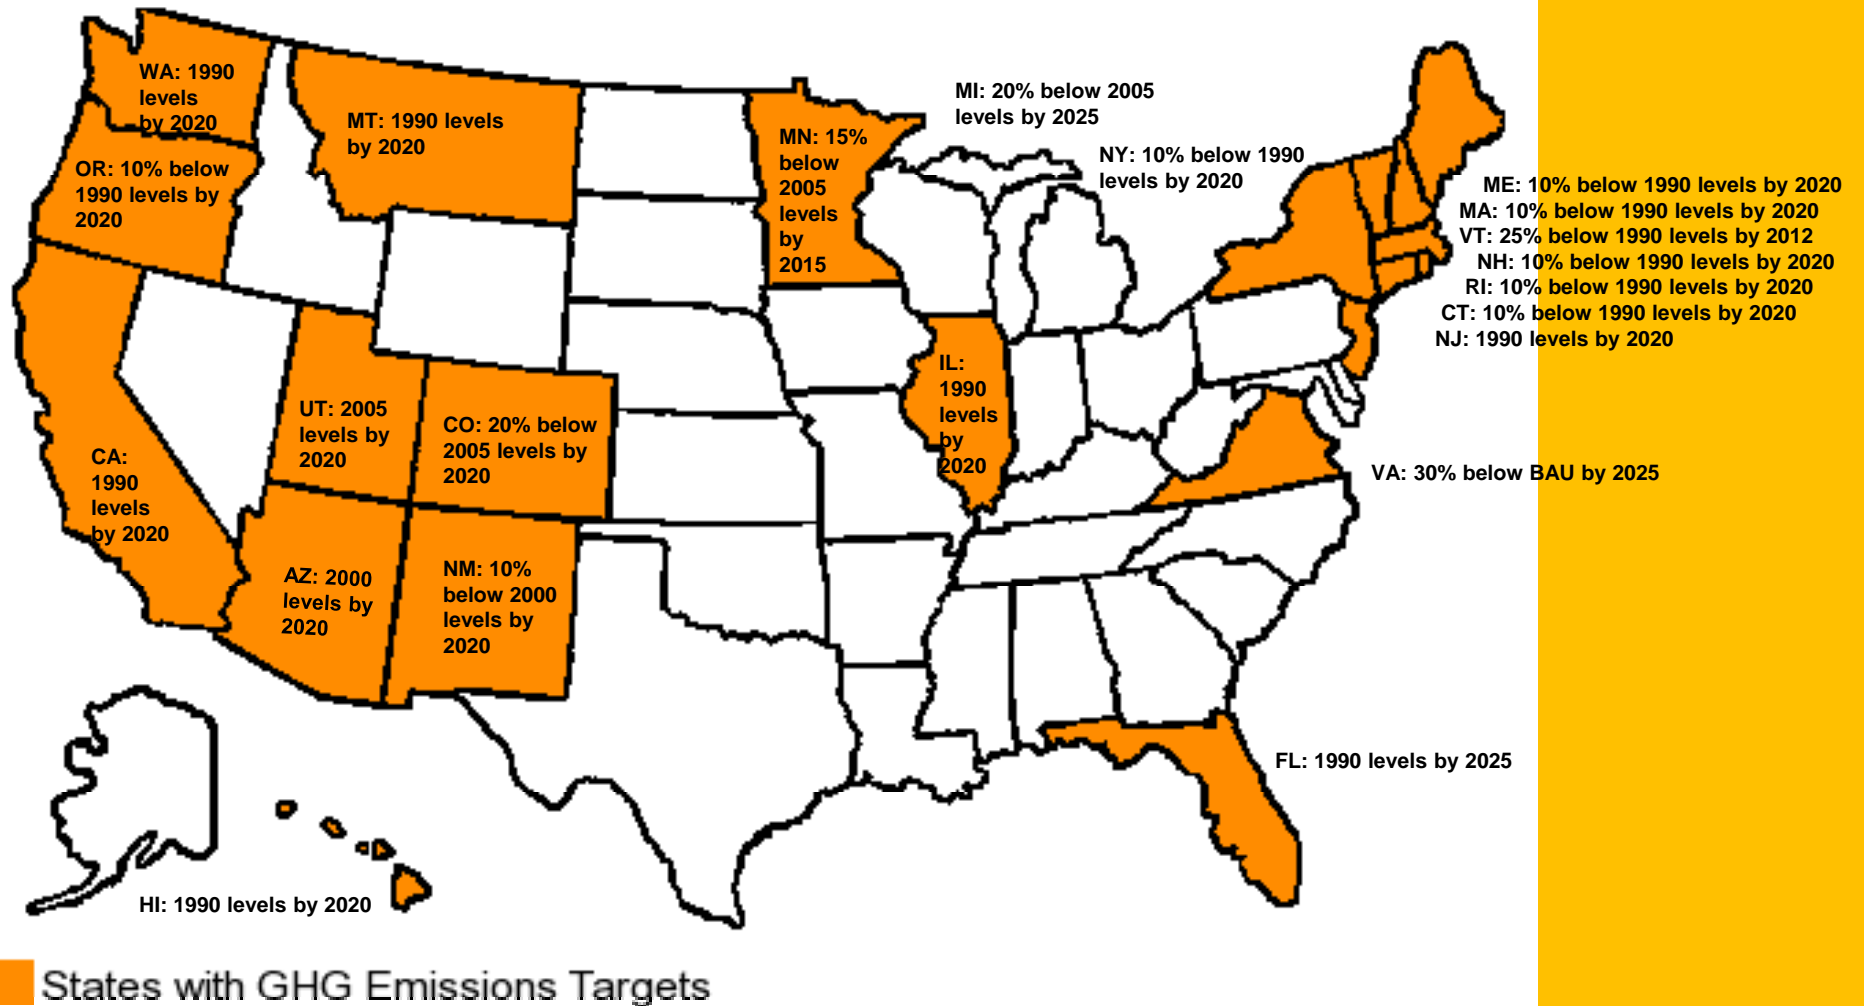

38 States have completed comprehensive Climate Action Plans, or are in the process of revising or developing one. In addition, more than half of the states have set up advisory boards or commissions to develop and/or implement climate action plans.

# States with Emissions Targets

# Montana Climate Action Plan

In 2007, the Climate Change Advisory Committee (CCAC) agreed upon 54 policy recommendations that are designed to help reduce Montana's emissions of GHGs to 1990 levels by the year 2020.
